Physical Campuses and new developments

**Engineering and Advanced
Manufacturing**

Lab Technicians

**Science Manufacturing
Technicians**

Skills for Success

Maslow (1970) suggests that all individuals have an in-built need for Personal Development which occurs through a process called self-actualisation. Self-actualisation is the desire that everyone has *'to become everything that they are capable of becoming.'*

Skills for Success is designed to ensure that employers get the very best out of their employees. We can work with you to map your organisation's core values to this programme.

Your employee will gain the **strength of character** to stand out above the rest, living and working as independent thinkers, confident in their choices and actions. We will help them to develop a **growth mindset** with skills that are transferable to wherever their career path takes them. These transferrable skills combined with technical understanding and subject knowledge will equip them with the tools they need to carry out their role to the **best of their ability**.

Wrap-around Support

- **Dedicated Support Team**
- **Well-being and learning support**
- **Celebrating Neurodiversity**
- **CognAssist Neuroscience evidence based support strategies**
- **Effective links with local support groups**

Supporting Future Skills

- **Green Skills/Green Jobs**
- **Sustainability**
- **Investing in new technologies**
- **AR and VR**
- **AI in Education**
- **Curriculum Development Groups**
